Agnite

Agnite

Pioneer in Athletic Evolution

A professional sporting equipment brand of Deli Group

The Vitruvian Man, one of Leonardo da Vinci's most famous masterpieces, celebrated the fitness and beauty of the human body and its golden ratio; it depicts the most precisely proportioned male figure and "perfectly proportioned" is often used to describe the human body in later times.

Agnite

Pioneer in Athletic Evolution

Life is movement

Exercise improves your mood, makes you happy, keeps you healthy, and makes you more successful in life!

Why should you exercise?

For the momentary satisfaction after sweating, for the infinite pleasure with stress relieved, for a fit and beautiful body, for a free soul without burdens, and to avoid mediocrity to be your better self.

Sports allow you to be better yourself.

This is what evolution means!

Agnite's Mission:

Spread and promote the "athletic evolution" worldwide

The "athletic evolution" advocated by Agnite is essentially an evolutionary way of "moving" to help people get out of the comfort zone and mediocrity, to seek a better self, and thereby enjoy movement. This is exactly the process of making people better through movement.

Sport is evolution

Agnite initiates "sports evolution" in the world

Agnite

Evolution/ Extraordinary

Agnite, just be different.

Agnite, for extraordinary revolution!

Agnite

Pioneer in athletic evolution

In 1932, the FIBA Amateur was established, and men's basketball was recognized by the International Olympic Committee as an official event of the Olympic Games. In 1946, the USA formed the first professional basketball league, which is now the NBA. The CBA, established in 1995, is the leading basketball league in China.

Agnite

Pioneer in athletic evolution

No matter you play badminton against rules or just to keep fit, you keep on moving your feet, jump, spin around and swing the racket to hit the shuttlecock back and forth on the court using proper skills and footwork. These movements strengthen the muscle of upper limbs, lower limbs and waist, accelerate blood circulation and enhance the cardiovascular and respiratory functions.

Badminton is suitable for men, women, the elder and youngsters. The amount of exercise depends on your age, physique, playing level and court conditions. For teenagers, playing badminton is an effective way to accelerate growth and improve somatic function. It is desirable to take moderate exercise for 40-50 minutes.

String bed 14-16

Pioneer in athletic evolution

Racket scoop: When the shuttlecock is on the ground, you can pick it up with your racket. Press your racket to the circular portion on the bottom below the feathers, then quickly roll it towards you and flick it with your racket. If done right, the shuttlecock will now be resting on your racket, ready to serve. Once you've mastered this technique, you can get close to the shuttlecock quickly and pick it up before it has a chance to roll away.you can move very close to the shuttle and you can pick it up very fast before it rolls away.

F2200 3 pcs/pack
