Sustainable  
Collection

# OUR STORY & GOAL

As Asia's leading stationery and office supply manufacturer, Deli prioritizes sustainability and environmental protection at the core of our strategy. Our commitment is evident in significant progress achieved through adopting renewable energy sources, upgrading factory equipment for enhanced efficiency, and utilizing a sustainable logistical system with electric freight vehicles. Deli was recognized with the "Green Factory" award in 2018.

We heavily invest in eco-friendly material innovation, conducting thorough research to develop one-stop sustainable solutions for our clients. Our innovative, sustainable products have successfully entered European, American, and Australian markets, providing consumers with eco-friendly options. Deli not only produces sustainable products but also leads the industry with our sustainability goals. Deli, a sustainable leader for our evergreen future.

## PCR SERIES

PCR is not just a term; it's a commitment to closing the loop of consumption. Post-Consumer Recycled materials are sourced from items that have already fulfilled their original purpose, like plastic bottles or old textiles. Instead of ending up in landfills, these materials get a second chance at life, becoming the building blocks of our sustainable products.

## OBP SERIES

Discover a new chapter in sustainable stationery with our Ocean Bound Plastic (OBP) Collection. Revolutionizing the way you work and create, each item in this collection is meticulously crafted from reclaimed ocean-bound plastic. Our stationery not only offers functionality and style but also actively contributes to reducing marine pollution.

## BIO-BASED SERIES

The Bio-Based Series is a collection that transcends trends and embraces the elegance of nature. Our materials are sourced from bio-friendly resources, bringing you a range of bio-based wonders that redefine what it means to be stylishly sustainable.

## TIMBER SERIES

The Timber Series is a celebration of nature's resilience and the art of transformation. Timber, once part of structures or discarded wood, finds new life in our collection. Witness the magic as old becomes new, and each piece carries the history of sustainability and craftsmanship.
